UNIQUE IN POLITICS.

Father and Son Candidates on Opposite Tickets In California.

It is not unusual for father and son to take opposite views on political macters. In fact, cases have been known where in a family the head of the house was a dyed in the wool Republican, while one son was a Demoerat, another a Prohibitionist and anether a Socialist. It is certainly ungonal in politics, however, for father and son to be candidates on opposite

tickets and taking the stump against each other. This is the case in Callfornia just now, where Grove L. and Hiram Johnson are rupping for office.

Hiram, son of Grove L. Johnson, was recently nominated by the Republicans of the state for governor on the insurgent platform, while the father was a candidate on the stand pat or regular ticket. The son won out by a large majority, and the father went down to defeat. Then the Prohibitionists placed Grove L. Johnson's name on their ballot for assemblyman, and he got the nomination by one vote.

Thus we have the remarkable case of a father and his son taking the stump and vigorously opposing each

DIFFERENCES IN FOGS.

Sea Mist and London Gloom Have Nothing In Common.

The fog of London and the fog of George Walnwright and Ben Spencer, the sen alike discompose traffic, and each in charge of a train of freight omnibuses and steamships alike have wagons, were headed for the Missouri had to my to for safety. But while the London fog gets into your inmost room and baffles even the electric light -though the candle comes out triumphant curiously-the densest fog at sea does not disturb the saloon or the stateroom. Why is that?

The word "fog" has not been traced farther back than the sixteenth century, but the thing was known in the early years of the fourteenth. The commons, with the prelates and nobles visiting London for the parliaments and on other occasions, united to petition Edward I. to compel the burning only of dry wood and charcoal, as the growing use of sea coal corrupted the air with its stink and smoke, to the great prejudice and detriment of health. In 1808 the king prohibited the use of coal. Heavy ransom and fines were indicted for disobedienec. In the case of recalcitrant brewers, dyers and other artificers the furnaces and kilns were destroyed. But the restriction was evidently removed, for in 1308 \$250-probably equal to about \$4,000 now-was paid from the exchequer for wood and coal for the coronation of Edward IL - London

MODERN BUSINESS.

The Big Jobs Demand Hustlers Who Are Gentlemen.

A notable change has taken place in American business methods within the last decade. Increasingly men of large affairs are asking when a young man is recommended for a big job, "Is he a gentleman?" This is significant in two ways. It means that the big business men are themselves gentlemen and like to deal with men who growing on a piece of land on which speak their own language and that she and some half dozen Swiss chil-American business methods have dren had for years been accustomed to grown to be such that the gentleman has an advantage.

An Open Air Hotel.

A man from the west was looking for a friend in New York who had gone wrong. He heard his friend had been sleeping on the benches in Bryant park and went over there to look for him. There were a good many unfortunates on the benches, but the particular friend the westerner wanted to find was not there. However, the westerner did find another man from his own town whom he knew and who knew the man for whom he was searching.

"Where's Jones?" asked the west "Aw," replied the hobe sleeplly, "he gin't come in yet."-New York Sun.

IMPALED BY AN ARROW.

Pinned Through the Neck to a Tree, Yet He Survived.

It was in the summer of 1850 that river to bring supplies back to Colorapoints. The Indians were very troublesome in those days, and these two outfits always camped together for protection. One night they had arranged the camp, with the wagons forming a circle, and everybody but the guards was to be inside. Wainwright preferred to sleep in a clump of cottonwoods about a quarter of a mile off, and there he fixed himself with his negro servant as a bodyguard. Neither the camp nor Wainwright was disturbed during the night, but early the next morning while Wainwright was sitting on the ground with his back to a tree drinking his tin of coffee an arrow from an unseen fee entered his neck at the right of the jugular vein and was driven with such force as to impale the victim to the tree. The negro, believing his master was killed, ran to Spencer's camp and gave the elarm.

Spencer and some of his men rushed over to Wainwright. Instead of being dead Wainwright was not even seriously injured. Spencer cut the arrow off close to the point of entrance and then gently drew Watnwright's head forward until he was released. The victim suffered but little inconvenience from the wound, and by the time the trip was completed it was entirely healed .- Los Angeles Times.

The land had recently changed hands, and its new owner had put up a notice forbidding the plucking ings against the little foreigner, while letting the little natives go scot free.
